Title:

Comments: I am very against this project. I'm scared that the water will be drained so low it will affect the springs and poison what water is left. I am scared for the plants and animals and people but mostly the water, plants and animals. South 32 can brag about their latest technology all they want but when they jack up, mess with, deplete, reroute mess with etc this deserts most precious resource, WATER... that is already not abundant it's absolutely mind boggling that anyone could think this is a good idea.
