Comments: My family and community here in Tubac are worried about Hermosa Critical Minerals Project #65668. Our major concerns are: 1) the imminent air and water pollution, 2) heavy truck traffic, 3) groundwater depletion and 4) the disturbance and destruction of sensitive 'sky island' habitat used by a range of endangered species, from Mexican spotted owls to jaguars.

Please study again the impacts of the Hermosa Critical Minerals Project. The mining of "precious metals" will contaminate and destroy the Sonoran Desert, surrounding mountains, and rivers and lakes, not to mention clear air which is required for all sentient beings including us humans.
