First name: Hugh

Last name: Bialecki

Organization: Save Our Forest Assoc, Inc

Title: President

Comments: The Save Our Forest Association is concerned that the study area of Deep Creek does not include its headwaters adjacent to the Snow Valley Ski Resort. This seems to be a highly significant oversight given that the potable water supplied for the operation of Snow Valley, and the water used for snowmaking, comes from a 1000' deep groundwater well that is part of the SUP for Snow Valley and that the potential impacts to Deep Creek from the well have not been studied. To have the study area for Deep Creek begin at Hwy 18 and the Green Valley Lake Road where Deep Creek crosses under Hwy 18 eliminates the critical headwaters and Snow Valley well impacts.
