Comments: to have Seepage Creek available for a cross country ski trail would be a great addition for the Nordic Clubs in the Rio Grande Valley. Seepage is used in the summer by cars, pickups and ATVs so it does not appear that laying a cross country ski trail occasionally in the winter would have but minimal impact on the Seepage environment. My wife and I have a house in Creede and frequently cross country ski but the last few winters the availability of the Deep Creek Trail and 7 mile flats trail have been limited by lack of snow. To have Seepage available would be a great addition
