Comments: I have used the Yurt system of huts every year for the past twenty years as both a teaching opportunity for high school students and as a personal retreat for family and friends. Our most recent visit to Spruce Hole Yurt was a wonderful experience for all of us.

This letter is in support for restricted access for motorized vehicles outside of the current plan that allows motorized winter vehicles in the Trujillo Meadows area and watershed. Limiting access to these areas allows for BOTH limited motorized access and a wilderness experience for cross-country skiers.

Simply put, maintaining distance between these two user groups would benefit all involved and maintain the integrity of the management plan for the area.
