Comments: Since the Draft EFSF RAMP was general, I'll be general. And unlike Grampa Collord, I'll try to be nice as well. I would like roads that already exist to remain open to quads, sxs, jeeps, dirt bikes, fire trucks, rescue trucks, fire teams, supply and support vehicles, survey teams, trail maintenance teams and others than have not come to mind yet.

1. I think its illogical to close the roads in question; you have a hard enough time now battling fire in the area covered, closing the small roads is like shooting one's self in the foot and erasing the budget at the same time. Just to deal with the fires the way they have been in the last few decades -- increasingly hot and huge -- is horrific.
2. I believe it is extremely exclusionary and elitist to keep the people out who don't have the physical ability to hike, pack, or ride horses into the people's lands. Closing the roads in question does exactly that.
3. Doing so also erases history. To me, this is as horrific as the fires that past policies have fueled.

Thank you for reading my comments, I appreciate that.
