First name: Ionia

Last name: Aslon

Organization:

Title:

Comments: My name is Ionia. Thank you for the opportunity to provide input to this process.

I am concerned for the wellbeing of my family and neighbors. I have concerns regarding our air quality, our water quality, damages to the soil and our ability to grow pure food, loss of habitat for the incredible diversity of animals & birds in our region, increased noise pollution, increased traffic, and general loss of rural lifestyle. I would like to know specifics of the amount of water that would be taken from our aquifer. Please study the impact to tourism, to increased potential for illness.

Additionally, I would like a fact-based assessment of the increased value to the local economy vs. losses due to having a foreign company harvest our natural resources. Please study the history of the company and determine what potential outcome is likely.

And lastly, what is the cumulative impact of all of the above?
