First name: Liliana

Last name: Arcuschin

Organization:

Title:

Comments: I have great concerns about the health of those who are living in the area as well as those who will be working at or near the mine.

The mine must monitor the exposure to the chemicals for the health of workers, the surrounding area outside of the mine property, the health impacts from the dust, the noise, and vibrations.

Please study whether the mine will be notifying the community, the workers, or even visitors to the region about potential mental and physical health hazards from the process of extracting the minerals.

The mine must be required to inform workers of life threatening circumstances to prevent further disease and illness for them and their families.
