Title:

Comments: Please ask that a study be made to see if the power lines to the mine could be placed underground.

Please ask about a study on impact of a new road going to the mine; will it impact wildlife in the forest area.

Please make an impact study on dust in the air to affect air quality.

Please make a study on the drilling of additional wells in the forest to draw water and what this will do to the wildlife when there is nothing for them to drink because it is now a dried out desert

Please make a study on drawing water from this area on how it will impact the Santa Cruz

River water flow and quality.

Please make an impact study on Manganese dust on air quality for wildlife and humans.

Please make an impact study in this forest area on deer population and mountain lion population.

Please make an impact study on of the proposed mining methods long ter desertification of our precious and beautiful forest and San Cayetano Mountains.
