Comments: I support the Sweetwater Lake Recreation Management and Development Project to allow the Forest Service to improve recreation access and facilities and to authorize a along-term special use permit to the Colorado Parks and Wildlife to manage the area for the public as natural resource-based recreational and educational experience at Sweetwater Lake. I support this project because it is reflective of the culture and history of the area while managing visitation at the appropriate scale for the long-term viability of the 832 acres surrounding the lake and its resources.
