Title:

Comments: I am very concerned at lack of interest in the health and well being of the residents and all living things in Santa Cruz County AZ.

Truck traffic from the mine will run 24 hrs a day and right past my home. Our roads are not built for that heavy traffic. The dust will cover all plant life and pollute our air. Promises can be made, however the reality is trucks will not always be covered and dust still blows. Trucks will be covered in dust leaving the mine. We get to breath it.

Disgusting and a true health hazard. What about the birds and animals? They have no voice. However the Forest Service is sworn to protect them. Please do your job.
