Comments: The final OSV plan should NOT allow OSV use in non-motorized recreational areas including the Nordic ski trails and land surrounding the back country huts and yurts. These quiet winter recreation areas include: Big Meadows ski trail, Rock Creek ski trail, Lime Creek trail, Neff Mountain near Cumbres Pass, Lobo Peak on Wolf Creek Pass, Spruce Hole Yurt trail and surrounding area, Pass Creek yurt and surrounding area, the Matchless area adjacent to Wolf Creek ski area, and Big Meadows Reservoir Area south of FR 410.

There are very few areas for skiers and snowshoers to recreate in peaceful areas without noise and exhaust fumes, which the OSVs create. It is a serious public safety concern to have fast moving OSVs on the same terrain as non-mechanized travelers.

It would be highly beneficial to have designated separate areas for mechanized and non-mechanized travel to minimize safety concerns, and there should be enforcement of this policy.

Thank you
