Comments: I urge you not to fast-track the South32 Hermosa Mining project. Remember, your decision cannot be undone.

Local residents such as myself have many concerns about the environmental impact - groundwater contamination that supplies wells, ranches, & farms, pollution, effect on climate, livability, tourism dollars. waste left behind during & after operation, including tailings.

Also for those of us who use the area for recreation, we will be affected by reduced access, contaminated access, light & noise pollution. And, we're very concerned about the negative impact on our fragile flora & wildlife. Please give this MUCH more consideration & do not fast-track the project because of outside pressure.
