First name: Barbara

Last name: Hill

Organization:

Title:

Comments: I am concerned about any mining project that will empty any liquids or solids into the Santa Cruz River. This river is vital to the Santa Cruz Valley area and beyond. It is our human and wildlife, birds and fishes drinking water and home; plus being a major migration flyway north and south through this area. The Santa Cruz River needs to be left alone, unpolluted and preserved for this important region.
