Comments: I am very concerned about the environmental impact of South32 operations in the Patagonia mountains at the Hermosa mine project. South 32 historically, in all of their global mining endeavors, has only ever paid lip service to the preservation of community health and to the protection of the environment. They inevitably leave a mess for the affected citizens to clean up, if restoration is even possible. South32 leaves devastation in their wake wherever they go. South32 will only do the same in our beautiful mountains. I would prefer that S32 leave Patagonia but if they are to be forced on us they must be held to the strictest of standards and CITIZEN oversight !
