Comments: South32 is an amazing project and is proof that a technologically driven, eco friendlier mining model is possible. All impediments should be removed and the Federal Gov't should take credit for moving this project forward. Besides the emphasis on mining rare earth metals that we have deemed essential for the new EV economy, the impact on Santa Cruz County is enormous. and literally life changing. The emphasis South 32 is putting on training the local population, building a remote monitoring g site, roads, etc. will positively impact the area in a way that is literally life changing.
