Title:

Comments: Arizona should be supportive of all business enterprises that come to our State to create business opportunities and make responsible use of our resources. I believe that South 32 is one of those entities. I wholeheartedly support their new mining venture in Santa Cruz County. I believe that a successful Hermosa Project will create employment opportunities for not only the current workforce, but many of the young persons that are graduating from our high schools and colleges. Enterprises like Hermosa Project generate a substantial number of direct jobs, but they also generate many more indirect business opportunities and employment positions.
