Comments: I love the natural wonder and beauty of the area. A wonderful gift of nature is the quiet and solitude one gets when out hiking or cross skiing. Enjoying nature and keeping some areas for simply enjoying the quiet. I believe protecting some areas from motorized vehicles honors our forest, animals and people. It's very special to have places to visit that remain as close to their natural and wild state as possible.

Thank you for considering the continued protection of these more quiet zones of land and forests.
