Title:
Comments: I support thinning and opening the forest to people collecting the thinned wood. Consider working with volunteer organizations like the Sierra club.
Please consider using goats to help with thinning brush, especially in rough country. Galloping Goat pumpkin patch is local and has been on the news.

Given the proximity to homes, and the history of prescribed burns becoming uncontrolled, I urge you to exercise extreme caution in starting a prescribed burn. Certainly a prescribed burn should not be done in drought-dry conditions with high winds. Additionally a burn should be done only when rain is anticipated with high probability, and when firefighters are available. Please consider working closely with local officials in making the decision for a prescribed burn.
Thank you for the opportunity to tell you my thoughts.
