Title:

Comments: I, my husband and friends often use the area in question for cross country skiing and snowshoeing. I am not in favor of anymore snowmobile access in that area, as they create noise and air pollution. I hope that this invasive type of recreation will be limited. I find that snowmobile riders are more often than not impolite to people on foot, blasting by us and not respecting us as fragile individuals on foot. Some education on shared trail etiquette could be very helpful.
