Title:

Comments: As a member of the Pagosa Springs Nordic Club, I support the establishment of non-motorized recreation areas for quiet, human powered activities such as cross country skiing and snowshoeing. Signage on Wolf Creek Pass similar to that at the Spruce Hole Trailhead could be useful in informing non-local snow machine users where they can and can't go to ride. We have had interactions with some of the commercial tour groups, and they have been quite respectful. However, we have also had less pleasant interactions with individuals on Lobo Pass and around Pass Creek yurt, and we've seen the damage caused by snow machines on the groomed trail on Fall Creek Road.

Thank you,

Jan Hester
