Title:

Comments: I work in this area teaching snowmobiling and recreating in the forest and have for about 10 years. There is a long history of winter recreation in this forest without conflicting uses. Please enable us to continue snowmobiling in areas that are not designated as Wilderness. Roadless areas are desired for us in snowmobiling and I request that you apply the Colorado Roadless rule as required in the 2012 Colorado Proposal. Please consider that non-motorized groomed routes currently exist in the forest and should be part of the the proposed travel management plan. I do not support closing any new areas to motorized use, particularly winter snowmobiling.
