Title:

Comments: Please stop limiting access to public lands. The people who actually live close to and recreate in and care about our public lands need to have access to our public lands via motorized access. If the general public can not access our public lands as they currently are managed today, if you limit access. Down the road there will be less interest to protect them by future generations who will never have had experienced our National Forest open and free to travel, explore and recreate the way they have always been.

All user groups must have access to public lands.
