Comments: It is so absurd to me that the choice to reintroduce lynx came many years after snowmobiling. It is not right to take away more of the snowmobile terrain. It is already so small because there is so much wilderness. There is no motorized use in those areas. the Forrest service gets a lot of kickback from the snowmobile industry in town. I was a snowmobile tour guide for 9 Years down in Pagosa springs. Restricting these areas are people's lives and how they make a living. All done through special use permits of course. Do not restrict motorized use! Your telling me when lynx thrive the restriction would be lifted... that is again absurd.
