Title:

Comments: Old-growth forests must be protected at all costs from loggers / deforestation, wildfires, droughts, and disease. Please do not take away these forests. It takes 100 years to grow back or more. Animals and humans need them for our survival. We are at a pivotal point in time. If you do not save them, we will become extinct, especially with everything that is happening. PROTECT OUR FORESTS. People can get other employment. We need these carbon sinks. The animals need this home.
