First name: Jerry

Last name: Reinisch

Organization: USFWS

Title: Fish & Wildlife Biologist

Comments: After reviewing the materials provided the FWS would recommend the following for the Eben Cattleman #1 well pad project:

1. Project area should be surveyed by a qualified biologist for the presence of suitable Dakota skipper habitat. If present then the areas should be surveyed by a permitted Dakota skipper surveyor for presence/absence. If present then the FWS should be contacted.
2. Project activities should cease if a whooping crane is sighted within one mile of the location.
3. No trees should be removed from April 15- October 31 during the Northern Long eared bat active period.
4. Dust control should be maintained at all phases during the life of the project
