Comments: I am very concerned about the bike trail proposal. We moved to Mena for the natural beauty of the mountains... the trees... the peace! I am not against progress and business ventures, but to devastate the national forests will be devastating to this town. There are so many objections that have been discussed...the lifts will bring in extra man-made materials to ruin the natural beauty. I have discussed other possible consequences with other community members. Good points are accidents with the lifts. Concerns in crime rate exploding like in Broken Bow. There was also concern about impact on habitat destruction for Rich Mountain salamanders, snails and glow worms. So much will be destroyed, and no amount of money is worth that!
