Comments: We could submit the photos from years past and present to show how the Hemlock went from vibrancy to ghosts. In my opinion, the loss of the hemlock has raised the water temperature and made it more difficult for the fish to survive.

Also, where are the tax payor funds to maintain service roads (Wildcat Road). It's ridiculous that the road isn't maintained enough for us to use. After decades of family camping and memories, the road to Wildcat is blocked.
