Comments: I wholeheartedly support the inclusion of class 1 e-bikes on trails which are primarily used for biking. I have done many hours of trail maintenance and patrol work in a California State Park which allowed class 1 e-bikes on all multi-use trails. We did not see any increase in trail degradation, or in user conflicts with e-bike inclusion. My wife has a heart condition which reduces her stamina, and therefore she cannot climb any sustained grade on a normal mountain bike, but she does fine on her class 1 e-bike where she's allowed to ride it. Opening up these local trails to her and many others like her will be a wonderful thing.
