Comments: I think the use of E-bikes could be potentially dangerous on paths that have historically been trafficked by mountain bikes or hikers because e-bikes have the capability to go at a faster rate of speed than typical mountain bikes. I don't think I could trust the public to abide by posted speed limits. Additionally the presence of ebike batteries crashing or catching fire within our forests would be an increased hazard for our wildland firefighters who are not trained or equipped to suppress a lithium ion battery fire in even more hard to reach areas down trails and hiking paths
