Comments: We are a family of 5 who enjoys mountain biking together, however, one family member is mobility limited due to health issues and uses a class 1 e-bike to ride with the family.

Allowing class 1 e-bikes would allow our family to ride together in the Bend area instead of leaving one family member out of the activity. It is a reasonable accommodation to allow e-bikes so people with minor but prohibitive health issues to recreate on public lands that are designed for cycling.

Please record my comments as supporting the allowance of class 1 e-bikes on the Deschutes National Forest biking trails.
