Comments: Please consider only allowing e-bikes on PAVED trails in this area being considered. E-bikes encountered by a horseback rider (me) using the natural trails creates an extremely dangerous situation. E-bikes are silent and fast and can smash into front or rear of a horse without any warning. These two types of trail users should never be allowed on shared use trails. Ban one or the other! Paved trails should be for e-bikes. Thank you for soliciting input and thank you for your hard work.
