Title:

Comments: HI,

I've been on rides with people on e-mnt bikes and I've made a point of watching them ride to see if they are doing any damage, none. I find that the trails themselves govern how fast they can go. I feel 99% of the e met bike riders that have come up on me have been courteous and not aggressive. I really like that our older folks that can't do the trails like they could when they were younger can now get back out and enjoy the forest just like everyone else. In many cases, it's why they moved here.

I'm all for it
