Comments: I have been mountain biking on trails since 1985 (just shy of 40 years). At this stage of my 67 y/o life, my main bicycle is still 'analog'. However, last year I purchased a class 1 ebike. Why? Because I want to be able to ride and enjoy time with my younger faster friends without feeling like a hindrance, slowing them down, shortening the ride distance or inconveniently making them wait till I catch. up. It's a great equalizing tool for riding with friends of different speeds, ages and abilities. Let's focus on doing right rather than whether or not they should be allowed.
