Comments: I am in favor of class 1 e-bikes on the designated trails in the deschutes national forest. As a local Bend resident and a person with several age-related and non age-related physical conditions that reduce my ability to enjoy the outdoors, a pedal-assist e-bike would allow me to continue to enjoy the outdoors and specifically single track mountain biking for many years to come. I would say that additional clear signage at all major trailheads giving riders a list of rules to follow that encourage politeness and establish who has the right of way (e.g. does non e-bike have right of way over e-bike similar to bikes vs. hikers).

thanks,

Mike
