Title:

Comments: Please remember people like me who are partially disabled. I ride my e-bike regularly which brings me joy in addition to helping me stay as healthy as possible. I require the assistance of the extra power from the e-bike for both distance and hills. Without the right to use the trails with my e-bike like others get to use their bikes, I will be unfairly limited to where I can ride.

It is not my fault that I was born with these genetic conditions, I am respectful of others and I follow the rules when I ride. My e-bike should not be considered a motorized vehicle, it should be considered an assist device and allow me to ride anywhere others do.

I am not the only one. I know of others who also use e-bikes due to health or age and need an assist once in a while. Keep it fair...let us ride.
