Comments: Hello, I have made a couple comments throughout the process of the updates to Upper Millcreek Canyon. I did miss the last comment period regarding the Environmental Assessment (EA). I read the EA and was quite pleased. I had mostly good comments with not widening where it seemed an environmental issue and taking into account the historical bridges and taking into account the FS sensitive species at Thousand Springs. I understand that now is an objection period and though I have read what I can find about that I cannot tell for certain if my objection will count. If it does, my only objection is the lack of pursuing the addition of speed bumps to slow down bicyclists coming down the canyon, on even AND odd days. Thank you for listening and I hope my objection is taken into account.
