Title:

Comments: I strongly appose this development due to the impact it will have on our forest alongside the mountain. It will permanently destroy beautiful trees and fauna and have an unreversible impact on wildlife. There would be wildlife that would be permanently displaced and in some cases destroyed. The income that it might bring would not replace the impact on the environment that it would cause long term or permanently. It would be a big eyesore and cause tax issues that the federal government always burdens the taxpayer with. I DO NOT WANT THIS PROJECTTO BE DEVELOPED.
