Comments: This is a worthwhile project and I commend the Forest Service for undertaking it. My personal concerns with forest management are the following:

- 1- USFS roads must receive enough funding to maintain them properly.
- 2-Select timber harvesting is a proven method to improve a forest's and wildlife's health.
- 3- Mud Bogging and Rock Climbing with ORV's & SUV's need to be prohibited on USFS lands.

Thank you for this opportunity.
