Title:

Comments: in your DEIS, you use the verbs, preserve and monitor as actions needed to sustain the well-being of our old growth and mature forests. I encourage you to add the verb 'restore' to the plan. One of the important ways that we can mitigate the negative impact of climate change on the creation is to expand the habitat of trees. Your agency has done a wonderful job over the past years in managing your domain under the policy of multiple use. It is very important to manage trees under that same policy. Trees are not just a source of lumber, they have many uses.
