Comments: I'm nearly 60, have ridden motorcycles all my life and as those riding areas/opportunities have become more difficult to access after President Clinton did his decree, my class 1 e-bike has been a boon for me. I'm able to get to more trails than on my motorcycle and I'm a huge proponent of them. I have no cartilage in one knee and the e-bike helps me overcome this and strengthen the surrounding tissue keeping surgery away for a bit longer. Anyone who states these are destructive needs only to see the huge popularity in countries throughout Europe, that tend to have more stringent land use policies, to see that they are misinformed. Please consider opening ALL U.S. Forest Service land that allows normal MTB's to include E-MTB's. I will be visiting my brother in OR this Fall and would love to be able for us to go for a ride on the E-MTB's.
