Title:

Comments: You all know why it's a bad idea to eliminate more old growth forests in Indiana. You all know this state is a super majority Republican boondoggle for every company that wants to make a buck off our natural resources. You know our forest and agricultural resources are extracted and developed outside of the regions they came from. We become resource poor in agricultural and forested areas of Indiana.

<https://www.sciencedirect.com/science/article/pii/S1353829217311966> Just know that we are watching and talking and writing and voting. There will be consequences. We will not go down into third world status so easily as you may think.
