Comments: Dear Forest Service,

I am writing in support of the Jackson Mountain Landscape Project. The benefits to Pagosa Springs and surrounding communities, as well as to the natural habitat of Jackson Mountain, are considerable. The vegetation management and fuel reduction are improvements to our area that benefit both human and the environment. These projects will reduce the chances of wildfires that could threaten our communities and promote healthier forests. Healthier forests are essential for the well-being of wildlife. These projects are a benefit for all affected parties!
