Title:

Comments: I would LOVE to see this happen. E-bikes have given people who can no longer ride due to disability (like my wife), injury, age-related challenges and other issues prohibiting them from enjoying our beautiful forest trails.

As well as a boost to the suffering bicycle industry in a post-COVID world; this would assist in getting more people onto our forest trail systems, which could develop into a larger community working for trail advocacy.

Properly managed, I only see this as a good thing.

Thanks for proposing this!
