Title:

Comments: Please protect old growth forests in the eastern half of the country from logging, burning and the use of herbicides. These are fragile habitats for wildlife and a huge benefit in the fight against climate chaos. Natural woodlands are a huge carbon sink and it costs nothing to allow them to continue that work on our behalf. I live next to the Hoosier National Forest and I see many fewer bats and birds now than 20 years ago when we moved here. Also, fewer box turtles. The risk of species extinction is real and we are in line. Please do everything in your power to stop forest destruction/logging and protect our kids and grand-kids. This is what Biden's 2022 Earth Day directive would have you do.
