Comments: The Trails at Mena Project is a wonderful project that will provide unique recreational opportunities, show care and respect for the land and help stimulate job growth in the region.

Many different groups have collaborated to help make this proposed project into something that will increase the region's chances to benefit from the natural resources we hold dear.

Rural areas that succeed in retaining and growing their population by facilitating economic development projects do so only when they share a common vision and work together.

It has been my observation that Mena and the surrounding communities have a solid track record of doing both.

The Trails at Mena will be one of the coolest projects ever!

I totally support it and am looking forward to seeing the mountains from one of the lifts! I also hope that my grandkids will use it and enjoy it too.
