Comments: It is a good trail as it is.
This is not a good use of funds.
It seems that the point of this is to make another mountain bike trail without coming right out and saying it. Not in favor of that at this location.
If you want a bike trail run it up the access road along I70 to the tunnel.
Bike trails are never properly maintained. They have water troughs and are not well suited for hiking.
The money would be much better spent enforcing and repairing current trails that are damaged by bike traffic.
Would like to see a map of the proposal, maybe in CALTOPO.
