Comments: Thanks for your transparency in this project. I've not been to Sabino Canyon in 10 years since moving down to Green Valley, but was a frequent visitor 2006-2014. Was not aware of the level of infrastructure deterioration. What I appreciated in this proposal: careful attention to retaining flora and fauna during construction, especially avoiding proliferation of invasive species. I really like the inclusion of automated fee machines, parking lot restrooms, a grab-and-go, two food/beverage vendors, and mobile food carts for variety which frequent visitors will appreciate, especially when bringing out of staters to our jewel of Sabino Canyon.
