Title:

Comments: I strongly endorse the proposed Trails at Mena project for its potential transformative impact on the community. I fully believe the trails will offer a valuable opportunity to promote outdoor recreation and improve the quality of life for residents. Moreover, they have the potential to attract visitors, supporting local businesses and contributing to the area's economic growth. As a mountain biker and trail runner, I personally understand the connection to nature and promotion of active lifestyles that trails offer. The Trails at Mena will create a lasting positive impact for both residents and visitors alike.
