Comments: I am opposed to commercial logging in Lickstone Ridge area. After traveling extensively in europe, it is sad to see so many denuded hillsides from extreme logging, and learn about the consequences-- extinct wildlife and plantlife. We should have tree farms in areas that have already been destroyed by logging. We can't replace our natural forests. So much damage has already been done to the area, from clear-cutting in the early 1900's. Let's not keep making the same mistakes over and over.
